CATALOGUE

OF

HYMENOPTEROUS INSECTS

IN

THE COLLECTION

OF THE

BRITISH MUSEUM.

BY

FREDERICK SMITH, M.E.S.

PART V.

VESPIDÆ.

36
C

LONDON:

PRINTED BY ORDER OF THE TRUSTEES.

1857.

C T m. s.

PRINTED BY TAYLOR AND FRANCIS,
RED LION COURT, FLEET STREET.

P R E F A C E.

THE object of the present Catalogue is to give a complete list of all the genera and species of the Solitary and Social Wasps (VESPIDÆ) which have been described in works, and a description of those in the British Museum which appear to be hitherto undescribed.

The letters B.M. in the margin indicate the species now contained in the Collection of the British Museum, and their absence those which are desiderata.

JOHN EDWARD GRAY.

2nd March, 1857.

CATALOGUE

OF

HYMENOPTERA.

Div. II. ACULEATA.

Tribe 3. DIPLOPTERA.

Group 1. Solitary Wasps.

Fam. 1. MASARIDÆ.

This family contains some very anomalous species of Wasps, many of them differing in various characters from the true *Vespidæ*, but in one important characteristic they correspond with the latter family,—the prothorax is always prolonged backwards to the base of the wings. The anterior pair of wings have only two submarginal cells. The genus *Paragia* differs from the rest in not having the wings folded when in repose, and in some of the species having the eyes ovate, or but very slightly emarginate.

Genus 1. PARAGIA.

Paragia, *Shuck. Trans. Ent. Soc. Lond.* ii. 81.

1. PARAGIA DECIPIENS.

Paragia decipiens, *Shuck. Trans. Ent. Soc. Lond.* ii. 82. l. t. 8.
f. 3 ♀.

Sauss. Mon. Fauss. Guêpes, 54. 1.

Hab. Australia.

2. PARAGIA TRICOLOR. B.M.

Paragia tricolor, *Smith, Trans. Ent. Soc. Lond.* 2nd ser. i. 41. t. 5. f. 1 ♂ (nec ♀).

Paragia Smithii, *Sauss. Mon. Fauss. Guêpes*, 55. 3. t. 2. f. 1 ♀.

Hab. Australia (Adelaide).

3. PARAGIA SAUSSURII. B.M.

Paragia tricolor, *Sauss. Mon. Fauss. Guêpes*, 54. 2 ♀ (nec *Smith*).

Hab. Australia (Perth).

4. PARAGIA ODYNEROIDES. B.M.

Paragia Odyneroides, *Smith, Trans. Ent. Soc. Lond.* 2nd ser. i. 42. t. 5. f. 2 ♀.

Sauss. Mon. Fauss. Guêpes, 56. 4.

Hab. Australia (Hunter River).

5. PARAGIA AUSTRALIS.

Paragia Australis, *Sauss. Ann. Soc. Ent. Fr.* 3rd ser. i. Bull. p. 21; *Mon. Fauss. Guêpes*, 57. 5 ♂ ♀. t. 2. f. 2 ♂.

Hab. Tasmania. (Coll. M. Saussure.)

6. PARAGIA BICOLOR.

Paragia bicolor, *Sauss. Ann. Soc. Ent. Fr.* 3rd ser. i. Bull. p. 21 (1853); *Mon. Fauss. Guêpes*, 58. 6. t. 2. f. 3 ♂.

Hab. Australia. (Paris Muscum.)

7. PARAGIA BIDENS. B.M.

Paragia bidens, *Sauss. Mon. Fauss. Guêpes*, 59. 7 ♂ ♀.

Hab. Adelaide.

The male only in the Collection of the British Museum.

8. PARAGIA PRÆDATOR. B.M.

Paragia prædator, *Sauss. Mon. Fauss. Guêpes*, 59. 8 ♀.

Hab. Australia.

9. PARAGIA PICTIFRONS. B.M.

Female. Length $5\frac{1}{2}$ lines.—Black: the head and thorax closely covered with large confluent punctures; the anterior margin of the clypeus truncated, and having a minute tubercle in the middle; the mandibles obtusely subdentate at their apex; the inner orbit of the eyes notched, the notch orange, and a waved orange band crossing the forehead between the notches; an orange line on the lateral margins of the clypeus; the scape

ferruginous, the flagellum indistinctly so beneath. A narrow orange line on the posterior margin of the prothorax, an oblique line emanating from it and uniting with a large yellow spot beneath the wings; the posterior margin of the scutellum, the sides of the metathorax, the tegulæ, and two minute oblong spots on the mesothorax, near the basal margin of the scutellum, orange; the legs pale ferruginous, dashed with yellow; the wings fusco-hyaline, with a dark cloud occupying the marginal and first sub-marginal cells. The basal segment of the abdomen with a narrow yellow fascia on its posterior margin; the third segment yellow, with a semicircular transverse black spot at the base; the fourth segment yellow, with a transverse black stripe at the base, broadly emarginate on its posterior margin and not extending to the lateral margins of the segment; the fifth segment yellow, with a black spot on each side at the base; the sixth yellow; the abdomen pale ferruginous beneath, with an indistinct yellow transverse band on the third and fourth segments.

Hab. Australia (Swan River).

Genus 2. CERAMIUS.

Ceramius, *Latr. Consid. gén.* (1810).

Gnatho, *Klug, Mag. Nat. Freunde* (nec *Illig. Coleopt.*) (1810).

1. CERAMIUS FONSCOLOMBII.

B.M.

Ceramius Fonscolombii, *Klug, Ent. Monogr.* 229. 3 ♂.

Boyer de Fonsc. Ann. Soc. Ent. Fr. 1st ser. iv. 421. t. 10. f. A ♂.

St. Farg. Hym. ii. 590. 1.

Sauss. Mon. Fauss. Guêpes, 62. 1 ♂ ♀.

Hab. South of Europe.

2. CERAMIUS ORANIENSIS.

Ceramius Oraniensis, *St. Farg. Hym.* ii. 591. 2 ♂ ♀.

Lucas, Explo. Sc. Algér. iii. 225.

Sauss. Mon. Fauss. Guêpes, 65. 2.

Hab. Algeria.

3. CERAMIUS CAPENSIS.

Ceramius Capensis, *Sauss. Mon. Fauss. Guêpes*, div. 2. 66. 3. t. 3. f. 3 ♀.

Hab. Cape of Good Hope. (Coll. M. Guérin-Méneville.)

4. CERAMIUS SPIRICORNIS.

Ceramius (*Paraceramius*) *spiricornis*, *Sauss. Mon. Fauss. Guêpes*, div. 2. 67. 4. t. 3. f. 5 ♂.

Hab. Central Europe; Spain. (Paris Museum.)

5. CERAMIUS LUSITANICUS.

Ceramius (Paraceramius) lusitanicus, *Klug, Entom. Monogr.* 230 ♂.

Sauss. Mon. Fauss. Guêpes, 69. 5. div. 2. t. 3. f. 6 ♂.

Hab. Middle of France; Spain. (Coll. Dr. Sichel.)

6. CERAMIUS NIGRIPENNIS.

Ceramius (Paraceramius) nigripennis, *Sauss. Mon. Fauss. Guêpes*, div. 2. 69. 6. t. 3. f. 4 ♀.

Hab. Cape of Good Hope. (Coll. The Marquis Spinola.)

7. CERAMIUS LINEARIS.

Ceramius (Paraceramius) linearis, *Klug, Entom. Monogr.* 227. 2. *Sauss. Mon. Fauss. Guêpes*, div. 2. 71. 7 ♂.

Hab. Cape of Good Hope.

8. CERAMIUS CERECRIFORMIS.

Ceramius (Ceramoides) cerceriformis, *Sauss. Mon. Fauss. Guêpes*, div. 3. 72. 8. t. 4. f. 1 ♂.

Hab. Cape of Good Hope. (Coll. M. Guérin-Ménéville.)

9. CERAMIUS LICHTENSTEINII.

B.M.

Gnatho Lichtensteinii, *Klug, Mag. Gesellsch. Naturf. Freund.* iv. 38. t. 1. f. 3 ♀.

Ceramius Lichtensteinii, *Klug, Entom. Monogr.* 225. 1. *Sauss. Mon. Fauss. Guêpes*, div. 4. 73. 9.

Hab. Cape of Good Hope.

10. CERAMIUS REX.

Ceramius Rex, *Sauss. Mon. Fauss. Guêpes*, div. 4. 75. 10 ♀.

Hab. Cape of Good Hope. (Coll. The Marquis Spinola.)

11. CERAMIUS CAFFER.

Ceramius Caffer, *Sauss. Mon. Fauss. Guêpes*, div. 4. 76. 11.

Hab. Cape of Good Hope. (Coll. The Marquis Spinola.)

12. CERAMIUS MACROCEPHALUS.

Ceramius macrocephalus, *Sauss. Mon. Fauss. Guêpes*, div. 4. 76. 12. t. 3. f. 2 ♀.

Hab. Cape of Good Hope. (Coll. The Marquis Spinola.)

13. CERAMIUS CONSOBRINUS.

Ceramius consobrinus, *Sauss. Mon. Fauss. Guêpes*, div. 4. 77. 13 ♀.

Hab. Cape of Good Hope. (Coll. The Marquis Spinola.)

14. CERAMIUS VESPIFORMIS.

Ceramius vespiformis, *Sauss. Mon. Fauss. Guêpes*, div. 4. 79. 14 ♀.

Hab. Cape of Good Hope. (Coll. The Marquis Spinola.)

Genus 3. MASARIS.

Masaris, *Fabr. Ent. Syst.* ii. 283 (1793).

1. MASARIS VESPIFORMIS.

Masaris Vespiformis, *Fabr. Ent. Syst.* ii. 283. 1; *Syst. Piez.* 292. 1.

Coqueb. Illustr. Icon. t. 15. f. 4 ♂.

Latr. Ins. iii. 368; *Hist. Crust. et Ins.* xiii. t. 102. f. 8;

Encycl. Méth. t. 383. f. 7, 8; *Gen. Crust. et Ins.* iv. 144.

St. Farg. Hym. ii. 589. 1.

Schaum, Ann. Soc. Ent. Fr. 3rd ser. i. 653. t. 20. f. 1 ♂ ♀.

Sauss. Mon. Fauss. Guêpes, 92. 1.

Erynnis Romandii, *Sauss. Ann. Soc. Ent. Fr.* 2nd ser. x. Bull. xix. ♀.

Hab. Barbary.

2. MASARIS SPINOLÆ.

Masaris Spinolæ, *Sauss. Mon. Fauss. Guêpes*, 95. 2 ♀.

Hab. Cape of Good Hope.

Genus 4. TRIMERIA.

Erynnis, *Sauss. Ann. Soc. Ent. Fr.* 3 ser. i. Bull. p. 22.

Trimeria, *Sauss. Mon. Fauss. Guêpes*, 81.

1. TRIMERIA AMERICANA.

Erynnis Americana, *Sauss. Ann. Soc. Ent. Fr.* 3 ser. i. Bull. p. 22.

Trimeria Americana, *Sauss. Mon. Fauss. Guêpes*, 81. 1. t. 4. f. 2, 2 a, 2 b ♀.

Hab. Brazil.

Genus 5. JUGURTIA.

Celonites, *St. Farg. Hym.* ii. 586 (1841).

Jugurtia, *Sauss. Mon. Fauss. Guêpes*, 83 (1854).

1. JUGURTIA ORANIENSIS.

Celonites Oraniensis, *St. Farg. Hym.* ii. 586. 2 ♂.

Lucas, Explo. Sc. Algér. iii. 227. t. 10. f. 12.

Dufour, Ann. Soc. Ent. Fr. 2nd ser. ix. 58. t. 3. f. 1 ♀ ♂.

Jugurtia Oraniensis, *Sauss. Mon. Fauss. Guêpes*, 84. 1 ♂ ♀.

Hab. Algeria (Oran).

2. JUGURTIA NUMIDA.

Jugurtia Numida, *Sauss. Mon. Fauss. Guêpes*, 85. 2. t. 5. f. 3 ♂.

Hab. Algeria. (Paris Museum.)

Genus 6. CELONITES.

Vespa, pt., *Villers, Entom.* iii. 281 (1789).

Chrysis, pt., *Rossi, Faun. Etrus.* ii. 77 (1790).

Cimbex, pt., *Oliv. Encycl. Méth.* v. 772 (1790).

Celonites, *Latr. Hist. Nat. Ins.* xiii. (1804).

Masaris, *Jurine, Hym.* (1807).

1. CELONITES ABBREVIATUS.

B.M.

Vespa abbreviatus, *Villers, Entom.* iii. 281. 38.

Chrysis dubia, *Rossi, Faun. Etrus.* ii. 77. t. 7. f. 10, 11.

Cimbex vespiformis, *Oliv. Encycl. Méth.* v. 772. 16.

Masaris apiformis, *Panz. Faun. Germ.* 79. 19.

Jurine, Hym. t. 10. f. 17.

Celonites apiformis, *Spin. Ins. Ligur.* i. 90.

Latr. Hist. Crust. et Ins. xiii. 354; *Gen. Crust. et Ins.* iv. 144.

Guér. Icon. Règ. Anim. t. 72. f. 1.

St. Farg. Hym. ii. 587. 3.

Celonites abbreviatus, *Sauss. Mon. Fauss. Guêpes*, 88. 1.

Hab. France; Germany; Switzerland; Italy; Algeria.

2. CELONITES FISCHERI.

Celonites Fischeri, *Spin. Ann. Soc. Ent. Fr.* vii. 505 (1838).

St. Farg. Hym. ii. 585. 1.

Lucas, Explo. Sc. Algér. iii. 226. t. 10. f. 11.

Sauss. Mon. Fauss. Guêpes, 89. 2.

Hab. Egypt; Algeria.

3. CELONITES SAVIGNYI.

Celonites Savignyi, *Sauss. Mon. Fauss. Guêpes*, 91. 3.

This species is figured in the "Description of Egypt," by Savigny, Hymenoptera, plate 9. fig. 19. ♂ & ♀. The details are those of a species distinct from the two former. See Saussure's Monograph.

Hab. Egypt.

4. CELONITES CYPRIUS.

Celonites Cyprius, *Sauss. Mém. Soc. Phys. Genève*, xiv. 4. 1.

Hab. Cyprus.

Fam. 2. EUMENIDÆ, *Westw.*

The anterior wings folded longitudinally, having three submarginal cells and two recurrent nervures; the eyes reniform, lateral, and extending to the base of the mandibles; the anterior and intermediate tibiæ armed with one spine at their apex, the posterior tibiæ with two spines; the claws of the tarsi bifid.

Genus 1. RAPHIGLOSSA.

Raphiglossa, *Saunders, Trans. Ent. Soc. Lond.* n. s. i. 72 (1851).

1. RAPHIGLOSSA EUMENOIDES.

B.M.

Raphiglossa Eumenoides, *Saund. Trans. Ent. Soc. Lond.* n. s. i. 72. t. 6. f. 4 ♂ ♀.

Sauss. Mon. Guêpes Sol. 2. 1.

Hab. Albania.

2. RAPHIGLOSSA ZETHOIDES.

Raphiglossa Zethoides, *Sauss. Mon. Guêpes Sol.* 3. 2 ♂.

Hab. Algeria.

3. RAPHIGLOSSA FILIFORMIS.

Raphiglossa filiformis, *Sauss. Mon. Guêpes Sol.* 3. 3. t. 8. f. 1 (male only).

Hab. Algeria?

4. RAPHIGLOSSA SYMMORPHA.

Raphiglossa symmorpha, *Sauss. Mon. Guêpes Sol. Supp.* 114 ♀.
Hab. Algeria.

5. RAPHIGLOSSA NATALENSIS.

B.M.

Female. Length $6\frac{1}{2}$ lines.—Black: the head and thorax strongly and closely punctured; the head subquadrate, very convex; the clypeus widely emarginate in front, with a small tubercle in the middle; the mandibles very stout, quadridentate and slightly ferruginous near their apex; the scape and basal half of the flagellum ferruginous. The thorax transverse in front, with the lateral angles produced and acute, the margin of a reddish-yellow as well as the posterior margin of the prothorax; the tubercles, tegulæ, extreme apex of the metathorax at the insertion of the petiole of the abdomen, and the legs, ferruginous; the coxæ black; the wings subhyaline, the anterior pair with a fuscous stain along their anterior margin. Abdomen: the petiole elongate, with a minute tubercle on each side about the middle; the apex yellow; the second segment with a narrow pale yellow band on its apical margin which is continued beneath the abdomen; above, the band is slightly emarginate on each side—beneath, it is notched on each side and widened in the middle; a pale spot in the middle of the apical margins of the third and fourth segments above.

Hab. Port Natal.

Genus 2. STENOGLLOSSA.

Raphiglossa, *Saund. Trans. Ent. Soc. Lond.* n. s. i. 72 (1851).
 Stenoglossa, *Sauss. Mon. Guêpes Sol.* 4 (1852).

1. STENOGLLOSSA ODYNEROIDES.

B.M.

Raphiglossa odyneroides, *Saund. Trans. Ent. Soc. Lond.* n. s. i. 72. t. 6. f. 2, 3.

Stenoglossa odyneroides, *Sauss. Mon. Guêpes Sol.* 5. l. t. 2. f. 2.

Hab. Albania.

Genus 3. GAYELLA.

Gayella, *Spin. Faun. Chili*, vi. (1854).

1. GAYELLA EUMENOIDES.

Gayella Eumenoides, *Spin. Faun. Chili*, vi. t. 2. f. 2.

Sauss. Mon. Guêpes Sol. 6. l. t. 8. f. 4 ♀.

Hab. Chili.

2. GAYELLA MUTILLOIDES.

B.M.

Gayella Mutilloides, *Sauss. Mon. Guêpes Sol. Supp.* 114. 1 ♀.*Hab.* Chili.

Genus 4. ELIMUS.

Elimus, *Sauss. Mon. Guêpes Sol.* 7 (1852).

1. ELIMUS AUSTRALIS.

Elimus Australis, *Sauss. Mon. Guêpes Sol.* 8. 1. t. 8. f. 3 ♂.*Hab.* Australia. (Coll. J. O. Westwood, Esq.)

Genus 5. SMITHIA.

Smithia, *Sauss. Rev. et Mag. de Zool.* 371 (1855).

1. SMITHIA NATALENSIS.

B.M.

Smithia Natalensis, *Sauss. Rev. et Mag. de Zool.* 371 (1855).*Hab.* Port Natal.

Genus 6. ZETHUS.

Vespa, pt., *Fabr. Ent. Syst. Supp.* 263. 86 (1798).*Zethus*, *Fabr. Syst. Piez.* 282. 51 (1804).*Eumenes*, pt., *Latr. Hist. Nat.* xii.*Polistes*, pt., *Fabr. Syst. Piez.* 269 (1804).*Didymogastra*, *Spin. Mem. Accad. Torino*, xiii. 80 (1850).*Epipona*, pt., *Spin. Faun. Chili*, vi. (1854).*Calligaster*, *Sauss. Mon. Guêpes Sol.* 23. 2 (1852).DIV. I.—*Species of Java.*

1. ZETHUS CYANOPTERUS.

Calligaster cyanoptera, *Sauss. Mon. Guêpes Sol.* 23. 2 ♀.*Zethus cyanopterus*, *Sauss. Supp. Mon. Guêpes Sol.* 115.*Hab.* Java.DIV. II.—*Species of Africa.*

2. ZETHUS? PUBESCENS.

B.M.

Female. Length 6–6½ lines.—Black, and covered with a thin short cinereous pubescence; the mandibles, scape, and apical joint of the antennæ beneath, ferruginous; the head and thorax closely and strongly punctured; the tegulæ and legs ferruginous, the posterior tibiæ and tarsi obscurely so; the wings iridescent,

subhyaline, and with a fuscous stain along the anterior margin of the superior pair. The petiole of the abdomen elongate and cylindrical, the apex of the abdomen ferruginous.

Hab. Port Natal.

This insect may, when more specimens can be obtained, and the parts of the mouth examined, prove not to belong to the genus *Zethus*, and it is placed there with a doubt; it is represented by a single example in the Collection.

Div. III.—*Species of South America.*

3. *ZETHUS BRASILIENSIS.*

Zethus Brasiliensis, *Sauss. Mon. Guêpes Sol.* 10. 2 ♀.

Hab. Brazil.

4. *ZETHUS CHALYBEUS.*

Zethus chalybeus, *Sauss. Mon. Guêpes Sol.* 10. 3 ♀.

Hab. Brazil.

5. *ZETHUS CARBONARIUS.*

B.M.

Female. Length 17 lines.—Shining jet-black, except the flagellum, which is fulvous beneath, obscurely so at the base; the clypeus finely striated longitudinally, and covered with distant shallow punctures; above the clypeus the head is finely punctured. The thorax finely punctured, the metathorax with a fine short silky cinereous pubescence; the posterior legs within and the tarsi have a similar pubescence; the wings brown, darkest along the anterior margin of the superior pair. The dilatation of the petiole of the abdomen nearly ovate, and as well as the second segment, impunctate; the apical edge of the membrane of the second segment yellow; the following segments with shallow punctures; the abdomen punctured beneath, except the petiole and the base of the second segment.

Hab. Brazil (the Amazons). (Coll. II. W. Bates.)

6. *ZETHUS MAGNUS.*

Zethus magnus, *Sauss. Mon. Guêpes Sol.* 11. 4. t. 8. f. 5 ♂.

Hab. Brazil.

7. *ZETHUS LUGUBRIS.*

B.M.

Zethus lugubris, *Perty, Del. Anim. Art.* 144. t. 28. f. 4.

Sauss. Mon. Guêpes Sol. 11. 5 ♂ ♀.

Hab. Brazil.

8. ZETHUS MEXICANUS.

Vespa Mexicana, Linn. *Syst. Nat.* i. 953. 6.

Tigny, *Hist. Ins.* iii. 579.

Vespa recurvirostris, De Geer, *Mém. Ins.* iii. 579. t. 29. f. 4-6.

Zethus cyanipennis, Fabr. *Ent. Syst.* ii. 277. 86.

Polistes cyanipennis, Fabr. *Syst. Piez.* 275. 30.

Coqueb. Illustr. Icon. Ins. dec. i. t. 6. f. 4.

Vespa mexicana, Oliv. *Encycl.* vi. 673.

Eumenes cyanipennis, Latr. *Hist. Nat. Ins.* xii. 345.

Zethus cyanipennis, Latr. *Hist. Crust. et Ins.* iv. 138.

Ericks. Faun. et Flo. Brit. Guiana, iii. 590.

Sauss. Mon. Guépes Sol. 12. 6.

Hab. South America; Cayenne.

9. ZETHUS FERRUGINEUS.

B.M.

Zethus ferrugineus, Sauss. *Mon. Guépes Sol.* 14. 10 ♀.

Hab. South America; Brazil (Para).

10. ZETHUS PALLIDUS.

Female. Length $6\frac{1}{2}$ lines.—Pale testaceous yellow: the head, mesothorax above, the apical margin of the scutellum, and a longitudinal stripe on the petiole of the abdomen, black; the antennæ, mandibles, clypeus, and a transverse line above it, testaceous-yellow. The head and thorax with a thin golden-yellow pubescence, that on the metathorax and abdomen is more dense and longer, coarsely punctured; the wings subhyaline, the superior pair with a yellow stain on their anterior margin; beyond the stigma the margin is slightly fuscous; the mesothorax with two longitudinal yellow stripes; the central suture of the metathorax black. Abdomen: the apical margin of the second segment with a deep groove a little within, the margin itself much elevated.

Hab. Brazil. (Coll. F. Smith.)

11. ZETHUS SCULPTURALIS.

Male. Length 6-7 lines.—Black: the clypeus with large distant shallow punctures; the head above the antennæ coarsely longitudinally rugose; the anterior margin of the clypeus and a small ovate spot at the insertion of the antennæ yellow. Thorax: the prothorax transversely and coarsely rugose before the tegulæ, the mesothorax and scutellum longitudinally so; the metathorax, sides of the thorax, and the clypeus covered with cinereous pubescence; the prothorax with a deep transverse channel in

front, the anterior margin elevated; a spot on the tegulæ behind, and the posterior margin of the scutellum, yellow; the wings fusco-hyaline; the anterior femora yellow at their apex outside, and the tibiæ also with a yellow stripe outside; the claw joint of the tarsi rufo-testaceous. Abdomen: the apex of the petiole, and the second and third segments with a narrow yellow fascia; the margins of the following segments testaceous; the second segment of an obscure reddish-brown.

Hab. Brazil (Ega on the Amazons). (Coll. H. W. Bates.)

This species is closely allied to *Zethus cinerascens* of Saussure; the sex described is not indicated.

12. ZETHUS FRATERNUS.

B.M.

Zethus fraternus, *Sauss. Mon. Guêpes Sol.* 16. 14 ♂.

Hab. Brazil.

13. ZETHUS LOBULATUS.

B.M.

Zethus lobulatus, *Sauss. Mon. Guêpes Sol. Supp.* 116. 2. t. 6. f. 4, 4 a ♀.

Hab. Brazil (Amazons).

14. ZETHUS CINERASCENS.

Zethus cinerascens, *Sauss. Mon. Guêpes Sol. Supp.* 117. 3.

Hab. Brazil.

15. ZETHUS PARVULUS.

Zethus parvulus, *Sauss. Mon. Guêpes Sol. Supp.* 119. 5. t. 6. f. 1 ♀.

Hab. Brazil.

16. ZETHUS GENICULATUS.

Didymogastra geniculata, *Spin. Mem. Accad. di Torino*, ser. 2. xiii. 80. 61.

Zethus geniculatus, *Sauss. Mon. Guêpes Sol. Supp.* 120. 6 ♂ ♀.

Hab. Para.

17. ZETHUS HILARINUS.

Zethus Hilarinus, *Sauss. Mon. Guêpes Sol. Supp.* 120. 7. t. 6. f. 6 ♀.

Hab. Brazil.

18. *ZETHUS AURULENS*.

Zethus aurulens, *Sauss. Mon. Guêpes Sol. Supp.* 121.8.t. 6. f. 5 ♂.

Hab. Brazil.

19. *ZETHUS DUBIUS*.

B.M.

Female. Length $5\frac{1}{2}$ lines.—Black: the head, thorax and petiole closely and strongly punctured; a minute spot above the insertion of each antenna, and a similar spot behind the eyes, yellow; the anterior margin of the clypeus slightly emarginate in the middle. A line on the anterior margin of the prothorax laterally, a minute spot behind the tegulæ, one on each side of the scutellum, a transverse line on the post-scutellum, from the lateral angles of which a line runs down the metathorax to the insertion of the abdomen, yellow. A minute spot at the apex of the femora behind, another at the base of the tibiæ outside, the intermediate femora with a stripe beneath, and a narrow line on the tibiæ outside, yellow; the wings subhyaline, the anterior margin of the superior pair fuscous. The dilated portion of the petiole of the abdomen elongate-ovate, the apex with a yellow band; the apical margin of the following segments with narrow yellow bands.

The male differs in having the clypeus yellow and in having the anterior margin of the prothorax entirely yellow; otherwise resembling the female.

Hab. Brazil (Villa Nova). (Coll. H. W. Bates.)

20. *ZETHUS CARINATUS*.

B.M.

Male. Length 4 lines.—Black: the head, thorax, and petiole of the abdomen coarsely punctured, a longitudinal carina extending the entire length of the dilated portion, which is elongate and cylindrical. The clypeus, a minute spot in the emargination of the eyes, another above the insertion of each antenna, the scape in front, and a stripe on the mandibles, yellow; the anterior margin of the clypeus truncate in the middle. The anterior margin of the prothorax, a minute spot on each side of the scutellum and post-scutellum, and two longitudinal lines on the metathorax, running down to the insertion of the abdomen, yellow; the anterior and intermediate tibiæ outside, and the intermediate femora at their apex in front, yellow; the anterior tarsi rufo-fuscous; the wings subhyaline, the superior pair faintly clouded at their anterior margin. The apex of the petiole of the abdomen, and the apical margins of the segments with narrow yellow bands.

43. ZETHUS GRACILIS.

B.M.

Male. Length $4\frac{1}{2}$ lines.—Black: the head and thorax coarsely punctured; between the antennæ a transverse ridge, from the middle of which a carina runs downwards, terminating about the middle of the clypeus; a line on the scape in front, and an obscure spot at each extremity of the ridge between the antennæ, yellow. The metathorax with a deep central longitudinal impression, the sides of which are obliquely striated; the wings hyaline and iridescent, a fuscous stain along the anterior margin of the externo-medial cell, and the apical half of the marginal cell clouded. Abdomen covered with a beautiful reflective silky pile; the apical margin of the petiole and also of the following segment with a narrow yellow fascia; the swollen portion of the petiole with large scattered punctures.

Hab. Mexico.

44. ZETHUS LÆVINODUS.

B.M.

Female. Length 9 lines.—Black: the head strongly punctured, the punctures on the vertex scattered; the clypeus longitudinally rugose-striate, the striations irregular, the anterior margin rounded, slightly notched in the middle; the mandibles with deep coarse longitudinal grooves. Thorax: shining, with a few fine distant punctures above; the anterior margin of the prothorax sharply elevated, the lateral angles acute; the mesothorax with an abbreviated carina in the middle in front, and on each side with a deeply impressed longitudinal line extending from its anterior margin to the scutellum, the lines towards the scutellum parallel, but diverging towards the anterior margin; a short impressed line over the tegulæ; the metathorax opaque, the sides rounded and with a deep longitudinal impression in the middle; covered with silky pubescence; a spot at the lateral angles of the prothorax, another beneath the wings, and an interrupted line on the post-scutellum, yellow; the wings dark brown, with a rich purple iridescence, the posterior wings paler. Abdomen very smooth and highly polished.

Hab. Mexico.

25. EUMENES SUBLÆVIS.

B.M.

Female. Length 6 lines.—Black, smooth and shining: the head covered with fine shallow punctures; the clypeus, an angular spot on the mandibles at their base, the emargination of the eyes and a line behind them, a spot at the side of the posterior ocelli and a line in front of the anterior one extending to the base of the clypeus, yellow; the scape of the antennæ yellow in front, and the flagellum fulvous beneath. The thorax covered with minute shallow punctures; an interrupted transverse line on the prothorax, two longitudinal ones on the mesothorax, slightly divergent towards the head, two ovate spots on the scutellum, the tegulæ and a spot beneath the wings, a curved line on each side of the metathorax, the outer margin of which is angulated, yellow; the anterior and intermediate femora, tibiæ and tarsi yellow, the former with a dark stripe above, and the tarsi slightly ferruginous; a yellow spot on the intermediate coxæ outside; the posterior femora with a spot at their apex beneath; the wings slightly fuscous, darkest along their anterior margin. Abdomen: the first segment forming a long petiole which is finely roughened above and has a minute tooth on each side about the middle; the apical margin with a narrow yellow band; the apical margins of the second and third segments with a narrow yellow band which is interrupted on each side; the fourth segment with a

transverse yellow line in the middle of its posterior margin; a curved yellow spot on each side of the second segment beneath.

Hab. Borneo (Sarawak). (Coll. A. R. Wallace.)

26. *EUMENES FULVIPENNIS*.

B.M.

Female. Length 12 lines.—Black, with the wings pale reddish-yellow; of the size and form of *E. arcuatus*. The head and thorax closely and rather strongly punctured, very slightly shining; the labrum brown; the clypeus has the anterior margin slightly notched; the wings, with the nervures, ferruginous; the petiole smooth and shining; the rest of the abdomen subopaque; on each side of the petiole are two small indistinct pale oval spots; the legs black, with the claw-joint of the tarsi ferruginous.

The male closely resembles the female, and only differs in being rather smaller, and in having an obscure ferruginous stripe on the clypeus.

31. *EUMENES IMPERATRIX*.

Female. Length 10 lines.—Black: the head covered with large shallow confluent punctures; the clypeus with the basal half yellow; the scape in front, a spot between the antennæ and a line running from it up to the anterior stemma, yellow; the flagellum fulvous beneath; a narrow yellow indistinct line behind

the eyes. Thorax strongly punctured, with the scutellum and metathorax shining and less closely punctured; two yellow spots at the apex of the metathorax at the insertion of the abdomen; the anterior tibiæ in front, the claw-joint of the anterior tarsi, and the extreme apex of the intermediate and posterior femora, yellow. Abdomen: the basal segment clavate, with a transverse interrupted narrow yellow line at the extreme apex above; the second segment with a broad, deeply emarginate fascia on its apical margin.

Vespa petiolata, *Fabr. Sp. Ins.* i. 467; *Mant. Ins.* i. 292. 68;
Ent. Syst. ii. 278. 87.

Gmel. Ed. Linn. 2753. 51.

Oliv. Encycl. Méth. ii. 670.

Eumenes petiolata, *Fabr. Syst. Piez.* 284. 1.

Latr. Ins. iii. 360.

Westw. Ins. India, 90. t. 5. f. 2.

Sphex hesperus, *Christ. Hym.* 311. t. 31. f. 3 ♀.

Sphex rubicunda, *Christ. Hym.* 316. t. 32. f. 1 ♂.

Sphex turrimurarius, *Christ. Hym.* 321. t. 32. f. 32.

Sphex thoracica, *Christ. Hym.* 321. t. 32. f. 9 ♂.

Eumenes petiolatus, *Sauss. Mon. Guêpes Sol.* 47. 28.

Hab. Cape of Good Hope.

42. EUMENES HOTTENTOTTA.

Eumenes hottentotta, *Sauss. Mon. Guêpes Sol.* 63. 49 ♀.

Hab. Cape of Good Hope.

43. EUMENES ACUMINATA.

Eumenes acuminatus, *Sauss. Mon. Guêpes Sol. Supp.* 147. 36.
 t. 8. f. 2 ♂.

Hab. Cape of Good Hope.

44. EUMENES DYSCHERA.

B.M.

Eumenes dyschera, *Sauss. Mon. Guêpes Sol.* 50. 31 ♀.*Hab.* Tropical Africa.

45. EUMENES TINCTOR.

B.M.

Spheg tinctor, *Christ. Hym.* 341. t. 31. f. 1.*Eumenes Savignyi*, *Guér. Icon. Règn. An.* 446. t. 72. f. 4.*Spin. Ann. Soc. Ent. Fr.* vii. 503 (1833).*Eumenes tinctor*, *Sauss. Mon. Guêpes Sol.* 49. 30.*Savigny, Descr. de l'Egypt.* t. 8. f. 4.*Hab.* Senegal; Congo; Egypt.

46. EUMENES TROPICA.

B.M.

Eumenes tropicalis, *Sauss. Mon. Guêpes Sol.* 54. 36 ♀.*Hab.* Senegal.

47. EUMENES ASINA.

Eumenes asina, *Sauss. Mon. Guêpes Sol.* 59. 43. t. 11. f. 1 ♀.*Hab.* Senegal.

48. EUMENES LEPELETIERI.

B.M.

Eumenes Lepeletierii, *Sauss. Mon. Guêpes Sol.* 45. 24. t. 10. f. 3 ♀.*Eumenes formosa*, *Sauss. Mon. Guêpes Sol.* 56. 39.*Hab.* Senegal.

49. EUMENES FENESTRALIS.

B.M.

Eumenes fenestralis, *Sauss. Mon. Guêpes Sol.* 53. 35. t. 10. f. 6.*Hab.* Congo; Senegal.

50. EUMENES ÆTHIOPICA.

B.M.

Eumenes æthiopica, *Sauss. Mon. Guêpes Sol.* 62. 47 ♀.*Hab.* Congo.

51. EUMENES LUCASIA.

Eumenes Lucasia, *Sauss. Mon. Guêpes Sol.* 68. 55 ♂.*Hab.* Abyssinia.

52. EUMENES INSULARIS.

B.M.

Female. Length 8 lines.—Black: the mandibles, labrum, clypeus and a spot above it, the flagellum beneath, and a narrow

line behind the eyes, ferruginous; the vertex rather finely and distantly punctured. The prothorax above, a small spot beneath the wings, an interrupted narrow line on the posterior margin of the post-scutellum, and a similar one on each side of the metathorax, ferruginous; the legs ferruginous, with the coxæ black; the thorax shining black above, finely and not closely punctured; the wings subhyaline, having a brownish tinge with a fine violet iridescence, the anterior margin of the superior pair having a dark fuscous stain. Abdomen smooth, covered with fine changeable pile; the petiole armed on each side with a short stout acute tooth, the extreme apex beneath slightly ferruginous.

Vor. A narrow yellow line at the lower portion of the inner orbit of the eyes; the sides of the metathorax ferruginous.

Male.—Differs in having the clypeus and a spot above, and also a narrow line at the inner orbit of the eyes, not entering their emargination, yellow; otherwise, coloured like the variety of the female.

Hab. The Solomon Islands, or New Hebrides (*Voyage of H.M.S. Herald*).

This species is closely allied to *Eumenes Guerini* of Saussure, but the petiole is proportionably longer; it also bears a strong general resemblance to *E. xanthura*.

53. EUMENES GUERINI.

Eumenes Guerini, *Sauss. Mon. Guêpes Sol.* 62. 48 ♀.

Hab. Madagascar.

54. EUMENES REGINA.

Eumenes regina, *Sauss. Mon. Guêpes Sol.* 49. 29. t. 10. f. 8.

Hab. Madagascar.

55. EUMENES FLUCTUANS.

B.M.

Eumenes fluctuans, *Sauss. Mon. Guêpes Sol.* 43. 22 ♀.

Hab. New Holland.

56. EUMENES BICINCTA.

B.M.

Eumenes bicincta, *Sauss. Mon. Guêpes Sol.* 44. 23.

Hab. New Holland.

57. EUMENES LATREILLEI.

B.M.

Eumenes Latreillei, *Sauss. Mon. Guêpes Sol.* 51. 32. t. 10. f. 5.

Hab. New Holland.

58. EUMENES PHILANTES.

B.M.

Eumenes philantes, *Sauss. Mon. Guêpes Sol.* 54. 37 ♀.*Hab.* New Holland.

59. EUMENES ARCUATA.

B.M.

Vespa arcuata, *Fabr. Syst. Ent.* 371. 40; *Spec. Ins.* i. 467; *Mant. Ins.* i. 292. 66; *Ent. Syst.* ii. 276. 83.*Oliv. Encycl. Méth.* vi. 670.*Sphex arcuata*, *Christ. Hym.* 312.*Eumenes arcuata*, *Fabr. Syst. Piez.* 287. 11.*Sauss. Mon. Guêpes Sol.* 63. 50.*Hab.* New Holland; New Guinea (Triton Bay).

60. EUMENES URVILLEI.

B.M.

Eumenes Urvillei, *Sauss. Mon. Guêpes Sol.* 59. 44.*Hab.* Coast of New Guinea (Triton Bay).

61. EUMENES PRASLINA.

B.M.

Eumenes Praslina, *Guér. Voy. Coquille*, ii. 267. t. 9. f. 6 ♀.*Sauss. Mon. Guêpes Sol.* 64. 51.*Hab.* New Ireland (Port Praslin).DIV. V.—*Species of America.*

62. EUMENES URUGUAYENSIS.

Eumenes Uruguayensis, *Sauss. Mon. Guêpes Sol. Supp.* 139. 24. t. 7. f. 6 ♀.*Hab.* Brazil.

63. EUMENES CONSOBRINA.

Eumenes consobrinus, *Sauss. Mon. Guêpes Sol. Supp.* 140. 25 ♂.*Hab.* Brazil.

64. EUMENES GHILIANII.

Eumenes Ghilianii, *Spin. Mem. Accad. Torino*, xiii. 81. 62 ♂.*Sauss. Mon. Guêpes Sol. Supp.* 140. 26.*Hab.* Brazil (Para).

65. EUMENES VERSICOLOR.

B.M.

Eumenes versicolor, *Sauss. Mon. Guêpes Sol.* 71. 60 ♂.*Hab.* Brazil (Santarem). (Coll. H. W. Bates.)

66. EUMENES MICROSCOPICA.

Eumenes microscopica, *Sauss. Mon. Guêpes Sol.* 72. 62 ♀.*Hab.* Brazil.

67. EUMENES FILIFORMIS.

Eumenes filiformis, *Sauss. Mon. Guêpes Sol. Supp.* 146. 34 ♀.*Hab.* Brazil.

68. EUMENES GLOBICOLLIS.

Zethus globicollis, *Spin. Ann. Soc. Ent. Fr.* x. 150. t. 3. f. 6 (1841).*Eumenes globicollis*, *Sauss. Mon. Guêpes Sol. Supp.* 151. 40. t. 8. f. 6, 6a.*Hab.* Para.

69. EUMENES PUSILLA.

Eumenes pusillus, *Sauss. Mon. Guêpes Sol. Supp.* 149. 38.*Hab.* Brazil.

70. EUMENES PARVULA.

Eumenes parvulus, *Sauss. Mon. Guêpes Sol. Supp.* 149. 37. t. 8. f. 5, 5a.*Hab.* Brazil.

71. EUMENES AUROPILOSA.

B.M.

Male. Length 3 lines.—Black: the head closely punctured, the thorax coarsely so, the punctures confluent, both thinly covered with golden pile, the abdomen densely so. The clypeus slightly produced and emarginate in the middle; the scape in front and the flagellum beneath, ferruginous; a spot in the emargination of the eyes, and a line behind them, yellow. A spot on each side of the prothorax in front, another beneath the wings, the posterior margin of the prothorax, a minute spot behind the tegulæ, a narrow transverse line at the base of the scutellum, the post-scutellum, and two ovate spots on each side of the metathorax, yellow; the legs reddish-yellow, with the coxæ and base of the femora black. The wings subhyaline and iridescent, with a fuscous stain on their anterior margin. Abdo-

men: the basal segment campanulate, its apical margin yellow, with a yellow spot on each side uniting with the apical margin; the apical and lateral margins of the second segment, and an ovate spot on each side uniting with the margin, yellow; the third and following segments yellow; beneath, the apical margin of the second and the following segments yellow.

Hab. Brazil (Villa Nova).

72. EUMENES CINGULATA.

Eumenes cingulatus, *Fabr. Syst. Piez.* 287. 13.

Sauss. Mon. Guêpes Sol. Supp. 151. 41.

Hab. Cayenne.

73. EUMENES FLAVICORNIS.

Eumenes flavicornis, *Sauss. Mon. Guêpes Sol. Supp.* 141. 27.
t. 7. f. 4 ♂.

Hab. Venezuela.

74. EUMENES CANALICULATA.

B.M.

Vespa canaliculata, *Oliv. Encycl. Méth.* vi. 672.

Vespa diadema, *Fabr. Ent. Syst. Supp.* 263.

Eumenes diadema, *Fabr. Syst. Piez.* 285. 3.

Eumenes canaliculata, *Sauss. Mon. Guêpes Sol.* 68. 56. t. 11. f. 5.

Hab. South America.

75. EUMENES ORBIGNII.

Eumenes Orbignii, *Sauss. Mon. Guêpes Sol.* 69. 57 ♀.

Hab. Bolivia.

76. EUMENES COLONA.

B.M.

Eumenes colona, *Sauss. Mon. Guêpes Sol.* 70. 59 ♀.

Hab. Jamaica; Columbia.

77. EUMENES ORNATA.

Eumenes ornatus, *Sauss. Mon. Guêpes Sol. Supp.* 147. 35. t. 8. f. 3.

Hab. West Indies.

78. EUMENES CALLIMORPHA.

B.M.

Eumenes callimorpha, *Sauss. Mon. Guêpes Sol.* 71. 61. t. 12. f. 4.

Hab. Columbia.

79. EUMENES PICTA.

B.M.

Male. Length $4\frac{1}{2}$ lines.—The head black, the anterior margin of the clypeus notched; the scape in front, the clypeus and a spot above, and also the mandibles, yellow; the scape above and the flagellum ferruginous, the latter with a black stain above towards the apex. Thorax ferruginous, the anterior and posterior margins of the mesothorax with a black stain; the anterior margin of the prothorax, a large spot beneath the wings, the scutellum, post-scutellum and metathorax, yellow; the scutellum at the inferior margin and a triangular stain beneath the post-scutellum ferruginous; the wings subhyaline, with a yellow stain along the anterior margin of the superior pair, a dark fuscous cloud occupying the marginal cell; the legs yellow, the femora with a ferruginous stain above; the thorax beneath, the coxæ and base of the femora more or less, black. Abdomen ferruginous, and covered with a bright changeable pile; the petiole and base of the second segment of the abdomen black, the latter with a transverse ferruginous band dividing the darker part; the apical margin of the segment narrowly bordered with yellow.

Hab. St. Domingo.

This species closely resembles *Eumenes colona*, and both are found in St. Domingo; but, irrespective of size, the present species has the petiole of a different form, being wider and more convex towards the apex; the rest of the abdomen is more globose and not subpetiolated as in *E. colona*.

80. EUMENES ABDOMINALIS.

Sphex abdominalis, Drury, *Illustr. Ins.* i. t. 45. f. 2.

Vespa attenuata, Oliv. *Encycl. Méth.* vi. 674.

B.M.

Pachymenes chrysothorax, *Sauss. Mon. Guêpes Sol. Supp.* 153. 43.

Hab. Brazil.

7. PACHYMENES OBSCURA.

B.M.

Female. Length 9 lines.—Black, with an obscure ferruginous tinge in parts ; the elypeus deeply emarginate at the apex, smooth and slightly shining ; the extreme base of the scape and the flagellum ferruginous, the latter slightly fuscous above towards the base. The posterior margin of the prothorax, two abbre-

viated longitudinal lines on the mesothorax, an obscure spot on each side of the scutellum and the post-scutellum, ferruginous; the anterior tibiæ and tarsi in front, and the tips of the joints of the two posterior pairs, ferruginous; the wings flavo-hyaline; the metathorax with a deep longitudinal impression in the middle, and covered with a fine changeable pile. The second segment of the abdomen slightly wrinkled transversely on the disk.

Hab. Mexico.

This insect is placed with some hesitation in the genus *Pachymenes*; but the parts of the mouth cannot be examined: a single example only has been obtained.

Monorebia ephippium, *Sauss. Mon. Guêpes Sol.* 100. 2. t. 15. f. 9.

Hab. Australia.

2. *ABISPA AUSTRALIS*.

B.M.

Female. Length 1 inch.—This species closely resembles *A. splendida*, but appears to be intermediate between that species and *A. ephippium*. From *A. splendida* it differs in having the head entirely yellow; the scutellum and post-scutellum yellow; the metathorax is proportionably longer, its lateral posterior angles are acute, and on each side is a sharp serrated ridge; the basal segment of the abdomen has the sides less distinctly rounded. From *A. ephippium* it is distinguished by the colouring of the basal segment of the abdomen, which in this species is black, with a broad yellow band on its apical margin which widens at the sides; the segment is also more campanulate than in *A. ephippium*, which has the segment entirely yellow.

Hab. Port Essington.

This insect is regarded by Saussure as a variety of *A. splendida*;

if it be a variety, it must, I think, be so of *A. ephippium*: this point must be left for future determination by some entomologist resident in Australia who can carefully observe the habits of the insect.

3. ABISPA SPLENDIDA.

B.M.

Odynerus splendidus, *Guér. Voy. Cog. Ins.* 265.

Monorebia splendida, *Sauss. Mon. Guêpes Sol.* 99. 1.

51. ODYNERUS BASALIS.

B.M.

Female. Length 5-5½ lines.—Black: the head and thorax strongly punctured; the base of the clypeus, a spot between the antennæ, and an oblong one behind the eyes, yellow; the scape in front and a narrow line at the inner orbit of the eyes, terminating at their emargination, ferruginous. The prothorax anteriorly, a spot beneath the wings, the tegulæ, an interrupted line on the apical margin of the scutellum, and the post-scutellum, yellow; the metathorax truncate, with a ferruginous spot on each side, in the shape of a comma; the legs ferruginous, with the coxæ and trochanters ferruginous; the wings hyaline, the anterior margin of the superior pair yellowish, the nervures ferruginous at the base and brown towards the apex of the wings. Abdomen closely and finely punctured; the basal segment ferruginous; the apical margin of the segments with a yellow band, that on the second and two following segments widened laterally; a black subtriangular spot in the middle of the basal segment above; beneath, the second segment with a narrow yellow band on its apical margin, and having on each side, as well as the two following segments, an angular yellow spot.

60. ODYNERUS INTRICATUS.

B.M.

Male. Length $4\frac{1}{2}$ –5 lines.—Ferruginous: the head and thorax rugose; the clypeus deeply emarginate at the apex; the mandibles, clypeus and a spot above it, yellow; the apex of the mandibles ferruginous, their teeth black; a crown-shaped spot on the vertex, enclosing the stemmata; the prothorax in the middle anteriorly, and the tibiæ and basal joint of the tarsi, yellow outside; the wings fusco-hyaline, the superior pair with a darker cloud along the anterior margin, occupying and terminating at the marginal cell; the metathorax rounded, the post-scutellum bituberculate. Abdomen punctured, the punctures rather distant and slightly impressed on the disk of the first and second segments; on their margins and on the following segments the punctures are stronger; a band on the apical margin of the first segment, the sides and apical margin of the second segment, and the whole of the following segments, yellow; the inner border of the yellow margin at the sides of the second segment semicircular, and the inner border of the apical margin traversed by a black stain; beneath, the second segment with a black spot on each side, its apical margin bordered with yellow, which is produced in the middle into a quadrate shape; the third segment with a black spot on each side.

Hab. Bombay. (Coll. F. Smith.)

This species is probably the male of *O. punctatipennis*; if not, it is closely allied to it.

61. ODYNERUS FLAVO-LINEATUS.

B.M.

Female. Length 6 lines.—Black: the clypeus and a spot above it, a spot in the emargination of the eyes and an abbreviated line behind, with the scape in front, yellow; the apex of the flagellum fulvous beneath; the head and thorax closely punctured. The prothorax anteriorly, a spot beneath the wings, the tegulæ and a spot behind them, two abbreviated lines on the mesothorax touching the base of the scutellum, the post-scutellum, and a large subovate spot on each side of the metathorax, yellow; a fuscous spot in the middle of the tegulæ; a spot on the intermediate and posterior coxæ, a broad stripe on the femora in front, not extending to their base, the tibiæ outside, and the claw-joint of the anterior tarsi, yellow; the claw-joint of the intermediate and posterior tarsi rufo-testaceous; wings subhyaline, the anterior and apical margins of the superior pair fuscous. Abdomen closely and finely punctured, the apex nearly glabrous; the apical margins of the segments with a narrow yellow band; beneath closely punctured; the apical margins of the segments narrowly and obsoletely banded with testaceous yellow.

Hab. Java.

62. ODYNERUS CONFLUENTUS.

B.M.

Female. Length $5\frac{1}{4}$ lines.—Black: the head, thorax and abdomen covered with confluent punctures, which are elongate, and on the abdomen have a tendency to run into striæ. The scape in front, the clypeus and a spot above it, the emargination of the eyes and a broad stripe behind them, yellow; the flagellum beneath and the mandibles ferruginous. The prothorax in front, the mesothorax beneath the wings, two abbreviated lines on the disk of the mesothorax, the tegulæ, two ovate spots on the scutellum, the post-scutellum and the metathorax, yellow; the latter with a black stripe down the centre; the apical lateral angles of the metathorax acute; the legs yellow, the femora behind, the tips of the posterior tibiæ within and of the joints of the tarsi slightly ferruginous; the wings subhyaline, the costal cell and the apex of the anterior wings fuscous. Abdomen: the apical and lateral margins of the basal segment, a narrow band a little before the apical margins of the second and three following segments, yellow; beneath, the first and second segments yellow, the second with a narrow central black stripe; an interrupted yellow fascia on the apical margins of the three following segments.

Hab. Sumatra.

63. ODYNERUS RUFESCENS.

B.M.

Female. Length $4\frac{1}{2}$ lines.—Black: head and thorax strongly and closely punctured; the clypeus, labrum, scape in front and the face, reddish-yellow; a large black spot above each antenna and descending to the base of the clypeus; the antennæ and mandibles ferruginous, yellowish at their base; a broad orange stripe behind the eyes. The prothorax above, a spot beneath the wings, two longitudinal stripes on the mesothorax, the tegulæ, scutellum, post-scutellum, metathorax and legs, reddish-yellow; the tibiæ and femora paler outside, the margins of the scutellum and post-scutellum black; the metathorax truncate, rugose, and with a central longitudinal carina, the lateral margins of the truncation crenate; the wings fulvo-hyaline, with a fuscous cloud in the marginal cell. Abdomen: the first segment and the base of the second ferruginous; the apical margin of the first segment with a narrow yellow fascia, widest in the middle; the second and following segments with broad fasciæ, that on the second widest in the middle; beneath, ferruginous, a yellow fascia on the second segment, its anterior margin notched in the middle and emarginate on each side.

Hab. Ceram. (Coll. Madame Ida Pfeiffer.)

64. ODYNERUS FRAGILIS.

B.M.

Male. Length $3\frac{1}{2}$ lines.—Black: the head, thorax and abdomen coarsely punctured; the clypeus and a spot above it, the scape in front, a spot in the emargination of the eyes, another behind them, and the mandibles, yellow; the tips of the latter ferruginous, with their teeth black; a black spot on the clypeus; the flagellum fulvous beneath. The thorax truncate in front, a large spot on each side of the anterior margin of the prothorax, a spot beneath the wings, the hinder margin of the tegulæ, a subinterrupted transverse line on the scutellum and a large ovate spot on each side of the metathorax, yellow; the apex of the anterior and intermediate femora in front, the tibiæ outside, and the anterior tarsi, yellow, the latter with ferruginous stains; the intermediate and posterior tarsi dusky. Abdomen subpetiolate; the basal segment very narrow, about half the width of the second, which has an ovate yellow spot on each side at its base; the apical margins of the first and second segments, and a transverse spot on the apical margins of the fifth and sixth segments, yellow; the second segment with a yellow band on its apical margin, its anterior edge waved.

68. ODYNERUS NIGRIFRONS.

B.M.

Female. Length 8 lines.—Black: the head and thorax covered with coarse confluent punctures; the clypeus very convex, rugose and slightly notched at the apex; the scape yellow in front. The prothorax with two minute yellow spots on its anterior margin; the truncation of the metathorax slightly concave and sculptured with curved transverse striæ; the tegulæ, the femora towards their apex and the claws ferruginous; wings smoky-hyaline, with a beautiful violet iridescence. Abdomen closely punctured, coarsely so towards the apex; the two basal segments with a narrow interrupted yellow fascia on their apical margins.

Odynerus pusillus, *Sauss. Mon. Guêpes Sol. Supp.* 287. 172.

Hab. New Holland.

87. ODYNERUS FLAVO-CINCTUS.

B.M.

Male. Length 4 lines.—Black: the head and thorax roughly punctured; a minute spot behind the eyes, another between the antennæ and the clypeus, yellow; the clypeus deeply emarginate anteriorly, the angles spinose. Thorax: the prothorax anteriorly, a spot beneath the wings, another on each side of the scutellum, yellow; the metathorax concavely truncate, a minute tooth on each side in the middle of the margin of the truncation, the tooth yellow; the wings hyaline, the anterior margin of the superior pair fuscous; the knees, tibiæ and tarsi ferruginous. Abdomen shining; the first segment much narrower than the second and with a longitudinal impressed line above; the apical margins of the first and second segments with narrow yellow bands which are slightly notched in the middle; the second is continuous beneath, notched in the middle and emarginate on each side; the third and following segments have their apical margins obscurely ferruginous; the first segment and the base of the second with a bright silky pubescence.

Hab. New Holland.

This is probably the male of *O. emarginatus*, the species having the clypeus deeply emarginate and spined at the angles.

Odynerus Alexandrinus, *Sauss. Mon. Guêpes Sol.* 225. 133.*Hab.* Egypt.

133. ODYNERUS QUADRI-TUBERCULATUS.

B.M.

Male. Length 4 lines.—Black: the clypeus notched at the apex; the head and thorax coarsely punctured; the clypeus and a spot above it, a spot in the emargination of the eyes and another behind them, pale testaceous; a transverse ferruginous band on the clypeus, the mandibles, the flagellum beneath, and its two basal segments, ferruginous. The prothorax, a spot beneath the wings, the tegulæ, two minute spots on the scutellum and post-scutellum, the sides of the metathorax and the legs, ferruginous; the tibiæ outside and the basal joint of the tarsi white; a pale testaceous spot in the middle of the anterior margin of the prothorax, and another on the tegulæ in front; the wings subhyaline, the anterior and apical margins of the superior pair dark fuscous; the scutellum and post-scutellum subdentate on each side

laterally. The first and second segments of the abdomen ferruginous at the sides; all the segments with a white fascia on their apical margins; beneath, the second segment ferruginous, with a white fascia on its apical margin, the inner edge of which is waved.

Hab. Port Natal.

This species is allied to *Odynerus vulneratus* of Saussure.

134. ODYNERUS EUMENOIDES.

B.M.

Male. Length 3 lines.—Black: the abdomen subpetiolate, the first segment campanulate and much narrower than the second; the clypeus narrowed and bidentate at the apex; a transverse line at its base and a narrow line on the scape in front, yellow. The prothorax truncate, the metathorax rounded; the former with a line in front, a spot on the tegulæ behind, the post-scutellum, tibiæ and tarsi, yellow; the anterior legs wanting; the apical joints of the tarsi ferruginous; the wings hyaline, their apical margins clouded, as well as the apex of the externo-medial cell. The first and second segments of the abdomen with a yellow fascia on their apical margins; one or two of the following segments with a yellow spot in the middle of their apical margins.

151. ODYNERUS COMBUSTUS.

Male. Length 5 lines.—Ferruginous, variegated with yellow spots and bands: the clypeus narrowed in front and bidentate at the apex; the outer orbit of the eyes, the inner orbits as high as their emargination, the base of the mandibles, the clypeus, and a spot above it and the scape in front, yellow; the flagellum slightly fuscous above towards the apex. Thorax: the prothorax in front, a spot beneath the wings, the tegulæ, a line on each side of the scutellum, the post-scutellum, the sides of the metathorax, the coxæ in front, the tips of the femora and the tibiæ in front, yellow; the wings hyaline, with a fuscous stain along the anterior margin of the superior pair. Abdomen: the first, second and third segments with a yellow fascia on their apical margins, the second and third continued beneath; the entire insect closely and rather strongly punctured.

Hab. Africa (the Gambia). (Coll. F. Smith.)

In colouring, this species resembles *O. mutans*, but in that species the abdomen is smooth, and its first segment produced in the middle of its apical margin above into an angular shape, which is not the case in the present species.

152. ODYNERUS INSTABILIS.

Female. Length 4 lines.—Black: the metathorax red; the scape in front, the base and apex of the clypeus, the mandibles, a transverse line on the forehead entering the emargination of the eyes, a line on their inner orbit, and also an elongate spot behind them, yellow; the scape above and the flagellum, fulvous, the latter slightly fuscous above towards the apex; the mandibles usually more or less ferruginous. The prothorax anteriorly, a spot beneath the wings, the tegulæ, scutellum and legs, yellow; the coxæ and tarsi slightly ferruginous; the wings hyaline, with the anterior margin of the superior pair fuscous; the metathorax truncate and slightly concave. The first and second segments of the abdomen with a broad yellow fascia on their posterior margins,

which are widened at the sides ; the third segment with a narrower fascia and the following of a reddish yellow.

Male.—Frequently very highly coloured, the yellow markings being of a bright sulphur-yellow, and the clypeus notched at the apex ; the thorax ferruginous, the mesothorax stained with black at its basal and apical margins ; the abdomen ferruginous, with a black stain on the second and third segments above ; the colour variable, the thorax being sometimes black above.

Hab. South America.

200. ODYNERUS PRUINOSUS.

B.M.

Female. Length 6 lines.—Black : in certain lights, covered with fine silvery pile ; a stripe at the base of the clypeus, a minute spot between the antennæ and another behind the eyes, white ; the head, thorax and base of the abdomen strongly punctured ; the anterior margin of the prothorax, a spot beneath the

wings, the anterior and posterior margins of the tegulæ, a spot behind them, the post-scutellum and the lateral margins of the metathorax, a spot at the apex of the anterior femora behind, and the anterior and intermediate tibiæ outside, white; the metathorax truncate, slightly concave, with a central impressed line, on each side of which it is obliquely striated; the wings hyaline, with their margins clouded. The first and second segments of the abdomen with white fasciæ on their apical margins, that on the second continued beneath.

Hab. St. Domingo.

DIV. VI.—Species of North America (Mexico, Carolina, Arctic America, Canada, &c.).

201. ODYNERUS TUBERCULICEPS.

Odynerus tuberculocephalus, *Sauss. Mon. Guêpes Sol.* 139. 22.

 t. 16. f. 9.

Hab. Mexico.

202. ODYNERUS SIMILIS.

B.M.

Female. Length $4\frac{1}{2}$ lines.—Black: covered with ochraceous pubescence, and having also a clothing of changeable pale golden pile, that on the abdomen very brilliant in some positions; the clypeus truncate at the apex, the lateral angles acute, subdentate; a yellow spot between the antennæ and another at the apex of the clypeus. The thorax slightly narrowed anteriorly and posteriorly; the anterior margin of the prothorax not raised or sharply truncate; the metathorax rounded at the sides and truncate posteriorly and slightly concave; the wings hyaline, the anterior margin of the superior pair yellowish, the nervures ferruginous. Abdomen: the first segment much narrower than the second, strongly punctured, its apical margin marginate; the apical margin of the second and three following segments with a broad yellow fascia; the apical segment yellow with a black spot in the middle of its base; the fasciæ on the segments continued beneath.

Hab. Mexico.

This species closely resembles *Odynerus brevithorax*, but the thorax is not quadrate as in that insect, the metathorax is not widely truncate, nor is the post-scutellum produced at its apical margin: the form and sculpture of the basal segment are very different.

Hab. New Holland.

11. ALASTOR SIMILIS.

Alastor similis, *Sauss. Mon. Guêpes Sol.* 256. 11.

Hab. New Holland.

12. ALASTOR ARGENTIFRONS.

B.M.

Female. Length $5\frac{1}{2}$ lines.—Black: the head and thorax coarsely punctured; the clypeus much longer than broad, its apical margin obtusely emarginate; a minute spot behind the eyes, a spot between the antennæ and the clypeus, orange-red; the margins of the clypeus, a spot at its base, and an abbreviated line in the middle at its apex, black; the sides of the clypeus and inner orbit of the eyes with a glittering silvery pubescence. Thorax: an orange spot on each side of the prothorax in front; the knees, tibiæ and tarsi ferruginous; the wings fusco-hyaline, darkest along the anterior margin of the superior pair; the thorax beneath, the femora and abdomen beneath, covered with a fine silky silvery pubescence. Abdomen with an orange band on the apical margin of the first segment, which is recurved on each side; the rest of the abdomen orange-red above, with a large subangular black spot at the base of the second segment extending to two-thirds of its length; beneath, the first and second segments black, the second with an orange fascia on its apical margin suddenly widened on each side; the following segments have their apical margins yellowish.

Hab. Australia.

13. ALASTOR CARINATUS.

Female. Length 6 lines.—Black: the head and thorax coarsely punctured; the clypeus longer than broad, slightly reflexed at the apex, which is truncate; above and between the antennæ is a short carina; a minute orange spot behind the eyes. Thorax: a minute orange spot on each side of the posterior margin of the prothorax; the wings fuscous, darkest along the anterior margin of the superior pair; the knees and the tibiæ ferruginous, the latter dusky outside; the metathorax truncate, the truncation slightly concave, with an impressed longitudinal line in the middle. Abdomen: the first segment truncate at the base, with a slight carina at the verge of the truncation, which is rugose; the first segment with an orange band on its apical margin, widest and notched in the middle and emarginate on each side; the other segments yellow; the base of the second segment black at the base, forming an angular shape in the middle, and with a square notch on each side; beneath, tuberculate in the middle of its base.

Hab. Adelaide. (Coll. F. Smith.)

This species is allied to the *A. aureocinctus* of Guérin, which has the basal segment of the abdomen truncate; but that insect has the clypeus bidentate at the apex, and has also a minute

tooth in the middle between the lateral ones, independent of the difference of coloration.

14. ALASTOR LACHESIS.

Alastor Lachesis, *Sauss. Mon. Guêpes Sol.* 251. 3.

Hab. Tasmania.

15. ALASTOR TASMANIENSIS.

19. ALASTOR PICTETI.

Alastor Picteti, *Sauss. Mon. Guêpes Sol.* 256. 12.

Hab. Tasmania.

20. ALASTOR ALBOCINCTUS.

B.M.

Male. Length 5 lines.—Black: the head and thorax roughly punctured; a minute spot behind the eyes and the clypeus white; the anterior margin of the latter truncate, straight. An elongate spot on each side of the posterior margin of the prothorax, a spot beneath the wings, and a minute one on each side of the scutellum, white; the wings subhyaline, with the anterior margin of the superior pair darkest; the scale black, the tibiæ and tarsi ferruginous. Abdomen: the basal segment much narrower than the second and with a few scattered punctures; the apical margins of the first and second segments with a narrow white band.

Hab. Tasmania.

This is probably the male of *A. punctulatus*, which it closely resembles, and with which it agrees in having the anterior margin of the clypeus straight.

Group 2. Social Wasps.

Family 3. VESPIDÆ, *Steph.*

This group is distinguished by the intermediate and posterior tibiæ having two spines at their apex, and by the claws of the tarsi being simple.

Hab. Java.

4. ISCHNOGASTER CILIPENNIS.

B.M.

Male. Length $5\frac{1}{4}$ lines.—Black: the head smooth and shining; the clypeus prolonged into an acute point at the apex; the mandibles, organs of the mouth, extreme apex of the clypeus, the scape in front, the flagellum beneath and its three apical joints outside, of a pale yellowish-white; a broad yellow fascia on the front, crossing at the emargination of the eyes, its upper margin curved on each side, the curves meeting in front of the anterior ocellus; its lower margin irregularly notched. Thorax: the lateral hinder margins of the prothorax have a narrow border of yellow, which runs to the tegulæ; the anterior margin of the

latter, and a spot beneath the wings, yellow; the legs pale rufo-testaceous; the coxæ outside, the apex of the femora, and the anterior and intermediate tibiæ in front, yellow; the posterior tibiæ and tarsi, and also the intermediate tarsi, thinly fringed outside with long fine hairs; the anterior tibiæ have a row of spines or hairs which are thickened at their apex, forming clavate appendages; the scutellum, post-scutellum, and a longitudinal stripe, the width of the scutellum, on the metathorax, white; the wings subhyaline and splendidly iridescent; the hinder wings with a fringe of fine long hairs on their posterior margin. The petiole of the abdomen above, a transverse stripe at the base of the fifth and sixth segments, and the seventh entirely, yellow; a minute lateral spot on the third segment, and all the segments with a spot on each side beneath.

Hab. Malacca (Mount Ophir). (Coll. A. Wallace.)

23. ICARIA PENDULA.

B.M.

Female. Length $3\frac{1}{2}$ lines.—Ferruginous: covered with a fine short hoary down; the mandibles, a broad stripe behind the eyes, the clypeus, the face as high as the insertion of the antennæ, and the scape in front, yellow; the clypeus with a ferruginous stripe down the centre. Thorax: the anterior and posterior margins of the prothorax, the tegulæ, the basal and lateral margins of the scutellum, the post-scutellum, two broad longitudinal lines on the metathorax, and the breast and legs variegated with yellow; the wings hyaline, with a dark fuscous spot at the apex of the marginal cell. Abdomen: a narrow yellow fascia at the apical margin of the first segment; a large yellow macula on each side of the second at its base, and a broad fascia on its apical margin; the following segments sometimes with yellow fasciæ, sometimes immaculate, very variable in this respect.

Var. The yellow line at the base of the scutellum sometimes interrupted.

Hab. India (Bareilly). (Coll. C. Horne, Esq.)

This species closely resembles *Icaria variegata*, but it differs in having the petiole of the abdomen shorter, and in having only the margins of the scutellum yellow; a number of specimens with their nest having been examined and the above differences found to be constant.

24. ICARIA FORMOSA.

Icaria speciosa, Sauss. *Rev. Zool.* (1855) p. 374.

Hab. Sumatra; Malacca; Borneo. (Coll. A. Wallace.)

The specimens received from Borneo have the basal segment of the abdomen black.

28. ICARIA OPULENTA.

B.M.

Female. Length 6–6½ lines.—Black, and covered with a fine short changeable silky pile; the anterior margin of the clypeus angular, and bordered with white; a white spot at the base of the mandibles; the antennæ obscurely ferruginous beneath. The metathorax with a deeply impressed line in the middle and more or less ferruginous towards the apex; the wings subhyaline, with a fuscous stain along the anterior margin of the superior pair, which are also clouded at their apex, the marginal cell darkly so. The first and second segments of the abdomen ferruginous; the apical margins of the following segments obscurely rufo-testaceous.

Hab. Borneo (Sarawak). (Coll. A. Wallace.)

29. ICARIA FLAVO-PICTA.

B.M.

Female. Length 3½ lines.—Black: the mandibles, clypeus, a broad stripe at the inner orbits of the eyes terminating at their emargination, an interrupted line behind the eyes, and the scape in front, yellow; the flagellum fulvous beneath. The anterior and posterior margins of the prothorax, a spot beneath the wings and a second placed in an oblique direction beneath it, the coxæ, tips of the femora, and the tibiæ outside, yellow; the tegulæ, two longitudinal stripes on the mesothorax, two large ovate spots on the scutellum, the post-scutellum, and the sides of the metathorax, yellow; the wings hyaline and iridescent, the nervures brown; the tarsi rufo-testaceous. Abdomen: the basal segment with an ovate spot on each side at its apex, a waved line on each side of the second segment at its base, its apical margin as well as those of the following segments with a broad fascia, yellow; beneath, the second segment with a yellow spot in the middle at its base.

67. *POLISTES OCULATUS.*

B.M.

Male. Length 7 lines.—Black: the head and thorax densely covered with short fulvous pubescence; the face as high as the emargination of the eyes, the mandibles, outer orbits of the eyes, and the scape in front, yellow; the flagellum ferruginous above, with the two basal joints as well as the scape above, fuscous; the eyes very large, prominent, and approximating more than is usual in this genus. Thorax: a narrow line on the prothorax in front, a similar one on the posterior margin, a spot beneath the wings, the pectus, coxæ and femora in front, the tegulæ, two

obscure spots on the scutellum, and two narrow longitudinal lines on the metathorax, yellow; the metathorax is delicately striated transversely and has a deeply impressed fovea in the middle; the legs ferruginous, with the intermediate and posterior coxæ and femora, and also the posterior tibiæ behind, black. Abdomen ferruginous, with the base of the first and second segments black; their apical margins with a narrow yellow fascia; beneath, the margins of all the segments with a yellow fascia.

Note.—M. Saussure considers the *Vespa Britannica* of Leach synonymous with *V. sylvestris*; that this is an error, is proved by an examination of the identical specimens, which are figured in the 'Zoological Miscellany;' the specimen of the female is one having only a slight tinge of red on each side of the second segment of the abdomen, which is the characteristic of a large majority of the British examples of this sex of the species, but it is not indicated in the figure; in the figure of the male the rufous spot is omitted; but in that of the worker, the black band on the second segment is obliterated on each side, leaving only the transverse black stripe so characteristic of the species: the specimens figured by Dr. Leach are in the collection of the British Museum, and each one has the name *Britannica*, in Leach's handwriting, attached to the specimen; this places the matter beyond a doubt. It may also be well to mention the fact, that in a whole brood of *Vespa Norwegica* obtained from the North of England, not more than a dozen of the females had the red spot at the sides of the second abdominal segment; in *Vespa Norwegica* the second black band is not produced into an angular point on its lower margin in the middle, but in *Vespa sylvestris* it is always so.

21. *VESPA TYRANNICA.*

B.M.

Worker or female. Length $9\frac{1}{2}$ lines.—Black : the head and thorax with a thin black pubescence ; covered with fine changeable velvety pile ; the clypeus emarginate in front, the angles of the emargination rounded ; the mandibles, cheeks, clypeus, a trifid spot above and the inner orbit of the eyes, orange ; tips of the mandibles and inner margin, black ; the antennæ fulvous

beneath. The outer margin of the wing-scales testaceous; the wings yellowish, hyaline, and with a dark stain on the anterior margin of the superior pair towards their base; the nervures pale ferruginous, the costal nervure black; all the segments of the abdomen, except the basal one, broadly margined with yellow.

Hab. Singapore. (Coll. A. Wallace, Esq.)

This species somewhat resembles the *Vespa velutina*, from which it is distinguished by having a larger head, which is wider than the thorax; the basal segment of the abdomen is proportionably much longer, with its basal margin regularly rounded; and the antennæ are also shorter.

36. POLYBIA PALLIDI-PECTUS.

B.M.

Male. Length $5\frac{1}{2}$ lines.—Black : the clypeus, face as high as the insertion of the antennæ, the scape in front, the mandibles and outer orbit of the eyes, sulphur-yellow ; the flagellum beneath orange. Thorax : a narrow line on the anterior margin of the prothorax, another on its posterior margin, a similar narrow line at the base of the scutellum and post-scutellum, and also two lines running from the scutellum to the base of the posterior wings, yellow ; two oblique lines at the base of the

metathorax, the pectus, the coxæ and femora in front, yellow; the tibiæ and tarsi ferruginous and more or less fuscous above; the wings hyaline, the anterior margins of the superior pair yellowish, with a fuscous cloud in the marginal cell, the nervures ferruginous. Abdomen: the petiole elongate, with its apical margin as well as that of the following segment with a yellow fascia; beneath, the abdomen is more or less ferruginous in the middle, the apical margin of all the segments yellow.

Hab. Mexico.

This is probably the male of *Polybia pediculata*.

41. POLYBIA CORDATA.

B.M.

Female. Length $4\frac{1}{2}$ lines.—Black: the clypeus smooth and shining, its anterior margin forming an obtuse angle. The posterior margin of the prothorax, a connected oblique stripe beneath the wings, the posterior margin of the tegulæ, a minute spot at the lateral angles of the scutellum and the post-scutellum, yellow; the wings hyaline and iridescent, with a dark fuscous spot occupying the marginal cell and the apex of the externo-medial cell; the nervures dark towards the base of the wings and pale towards their apex. Abdomen heart-shaped; the first segment with a narrow yellow fascia on its apical margin, the following segments with a broad fascia; the fasciæ slightly notched in the middle and emarginate on each side; the fascia on the second

segment recurved at the sides and united to a large lateral spot at the base ; all the fasciæ except that on the basal segment continued beneath.

54. *POLYBIA ALBO-PICTA*.

Female. Length 9 mill.—Black : the clypeus angular in front and of a yellowish white, a spot above the clypeus and a broad stripe at the inner orbit of the eyes of the same colour ; a white line behind the eyes. The posterior border of the prothorax, the tegulæ, a line beneath the wings, the scutellum and post-scutellum with a minute spot on each side of both, and a large spot on each side of the metathorax, white ; the wings fusco-hyaline, the superior pair with a fuscous stain along their anterior margin, which entirely occupies the marginal cell ; the apical joints of the tarsi fusco-ferruginous. Abdomen : the apical margin of the basal petiolated segment with a broad white fascia ; the apical margins of the second and three following segments with a white border, the inner margin of which is more or less irregular.

Hab. Brazil. (Coll. W. Swainson, Esq.)

55. *POLYBIA BICOLOR*.

B.M.

Female. Length 10 mill.—Head and thorax black ; abdomen of a reddish brown ; the clypeus produced into an obtuse point anteriorly, with an impressed line at the apex ; the tips of the mandibles ferruginous. Thorax elongate-ovate, smooth and slightly shining above ; the posterior margin of the prothorax and the basal margin of the scutellum with a narrow yellow line ;

the wings hyaline, with a ferruginous tinge on the anterior margin of the superior pair; a dark fuscous cloud occupying the marginal cell and extending to the apex of the wing; the nervures ferruginous, becoming fuscous towards the apex of the wings. Abdomen: the petiolated basal segment rather darker than the following segments, its apical margin with a narrow yellow border; the following segments have a narrow pale fascia on their apical margins, beneath, but on the upper surface the fasciæ are scarcely distinguishable.

Hab. Brazil (Villa Nova). (Coll. H. W. Bates.)

56. POLYBIA DILIGENS.

B.M.

Female. Length 6 mill.—Black, decorated with yellowish-white markings: the clypeus, sides of the face, two united spots above the insertion of the antennæ, and a narrow line at the outer orbits of the eyes, yellow; the clypeus with a black stripe down the middle, not extending to the apical margin; the mandibles, scape, and flagellum beneath, fulvous. Thorax: a narrow line on the anterior and posterior margins of the prothorax, three oblique spots beneath the wings, the anterior and intermediate coxæ in front, the tegulæ, two longitudinal stripes on the mesothorax, the scutellum, post-scutellum, and a large spot on each side of the metathorax, yellowish-white; a fascia of the same colour on the apical margin of the petiolated segment of the abdomen, another on the apical and basal margin of the second segment, and a fascia on the apical margin of the third segment; the legs fusco-ferruginous, with the tarsi palest.

Hab. Brazil (Santarem). (Coll. H. W. Bates.)

57. POLYBIA FLAVIFRONS.

B.M.

Female. Length 9 mill.—Black: the face and vertex orange-yellow, with a line at the outer orbit of the eyes and a spot on the mandibles at their base of the same colour; the scape in front and the flagellum beneath, fulvous; a large cordate black spot on the vertex enclosing the stemmata. Thorax: a narrow line on the posterior margin of the prothorax, an oblique spot beneath the wings, the tegulæ and a narrow epaulet passing over them to the scutellum, a transverse spot before the latter emitting two narrow lines which terminate before the anterior margin of the mesothorax, the scutellum, post-scutellum, and a spot on each side of the metathorax, yellow; the anterior coxæ yellow in front; the legs fusco-ferruginous, palest in front; the wings subhyaline, with a narrow fuscous cloud along the anterior margin of the superior pair. Abdomen: the apical margins of

the segments with broad yellow fasciæ, which are slightly notched in the middle and waved on each side, that on the second segment running upwards laterally; beneath, the segments have a narrower border.

4. NECTARINA SMITHII.

B.M.

Nectarinia Smithii, *Sauss. Mon. Guêpes Soc.* 229. 4. t. 31. f. 8.*Hab.* Brazil.

5. NECTARINA BINOTATA.

Nectarinia binotata, *Sauss. Mon. Guêpes Soc.* 230. 5.*Hab.* Cayenne.

6. NECTARINA ANALIS.

B.M.

Brachygastra analis, *Perty, Del. An. Art.* t. 28.*Nectarina analis*, *Shuck. Cub. Cycl. Hist. Ins.* p. 183 (1840).*Guér. Icon. Règ. Anim. Ins.* 148. t. 28. f. 6.*Nectarinia analis*, *Sauss. Mon. Guêpes Soc.* 230. 6.*Hab.* Brazil.

7. NECTARINA VELUTINA.

Brachygastra velutina, *Spin. Ann. Soc. Ent. Fr.* x. 126. 77. t. 3. no. 5 ♀ (1841).*Nectarinia velutina*, *Sauss. Mon. Guêpes Soc.* 231. 7.*Hab.* Brazil; Cayenne.

8. NECTARINA LECHEGUANA.

Polistes lecheguana, *Latr. Ann. Sci. Nat.* 1st ser. iv. 335.*Nectarinia lecheguana*, *Sauss. Mon. Guêpes Soc.* 232. 8. t. 34. f. 3.*Hab.* Brazil.

9. NECTARINA MELLIFICA.

Polistes mellifica, Say, *Bost. Journ. Nat. Hist.* i. p. 390.

Nectarinia mellifica, Sauss. *Mon. Guêpes Soc.* 233. 9.

Hab. Brazil.

10. NECTARINA AUGUSTI.

Nectarinia Augusti, Sauss. *Mon. Guêpes Soc.* 233. 10.

Hab. Mexico.

11. NECTARINA AURULENTA.

Brachygastera aurulenta, Erichs. *Fauna und Flora Brit. Guiana*,
iii. 590.

Hab. British Guiana.

EXPLANATION OF PLATES.

PLATE I.

Fig.

1. *Paragia pictifrons*.
2. *Stenoglossa Odyneroides*.
3. *Gayella Mutilloides*.
4. *Raphiglossa Natalensis*.
5. *Smithia Natalensis*.

PLATE III.

Fig.

1. *Rhynchium Grayi*.
2. *Monobia angulosa*.
3. *Montezumia Indica*.
4. *Pterochilus insignis*.
5. *Leptochilus denticulatus*.

PLATE II.

Fig.

1. *Zethus lobulatus*.
2. *Discoelius insignis*.
3. *Zethus (Calligaster) gigas*.
4. *Eumenes multipictus*.
5. *Pachymenes chrysothorax*.

PLATE IV.

Fig.

1. *Alastor flavipes*.
2. *Belonogaster Guineensis*.
3. *Mischocyttarus Smithii*.
4. *Ischnogaster micans*.

PLATE V.

Fig.

1. *Polybia flavitarsis*.
2. *Nectarina Smithii*.
3. *Synæca testacea*.
4. *Vespa mandarinia*.

PLATE VI.

Fig.

1. Nest of *Eumenes tinctor*. Constructed of mud and suspended in stems of grass.
2. Nest of *Synagris mirabilis*. Constructed of sandy loam.
3. Nest of *Synagris calida*. Constructed of sandy loam.
4. Nest of *Pelopæus chalybeus*. Constructed of the excrement of cows or horses.
5. Nest of *Mischocyttarus labiatus*. Constructed of the scrapings of wood.
6. Nest of *Icaria guttatipennis*. Constructed of the scrapings of wood.
7. Nest of a species of *Eumenes*. Constructed of mud and attached to a reed.

List of the typical specimens of *Vespidæ* in the Linnæan Collection, preserved in the Museum of the Linnæan Society referred to the genera in which they appear in this Catalogue.

Vespa coarctata.

- *calida.*
- *cornuta.*
- *parietum.*
- *muraria.*
- *spinipes.*
- *bifasciata.*
- *Carolina.*
- *orientalis.*
- *gallica.*
- *biglumis.*

CATALOGUES
OF
THE ZOOLOGICAL COLLECTION
IN
THE BRITISH MUSEUM.

I. VERTEBRATA.

List of Mammalia. By Dr. J. E. GRAY, F.R.S. &c. 1843. 2s. 6d.

Catalogue of the Mammalia. By Dr. J. E. GRAY, F.R.S. &c.

Part 1. Cetacea. 12mo, 1850. 4s., with Plates.

Part 2. Seals. 12mo, 1850. 1s. 6d., with Woodcuts.

Part 3. Hoofed Quadrupeds. Section I. (Ungulata furcipedæ). 12mo. 1852, with Plates of Genera, 12s.

This work contains the description of the genera and species, and figures of the chief characters of the genera.

List of Mammalia and Birds of Nepaul, presented by B. H. Hodgson, Esq., to the British Museum. By Dr. J. E. GRAY and G. R. GRAY. 12mo. 1846. 2s.

List of Genera of Birds. By G. R. GRAY, F.L.S. 12mo, 1855. 4s.

List of Birds. By G. R. GRAY, F.L.S. &c.

Part 1. Raptorial. Edition 1, 1844; edition 2, 1848. 3s.

Part 2. Passeres. Section I. Fissirostres. 1848. 2s.

Part 3. Gallinæ, Grallæ and Anseres. 1844. 2s. (Out of Print.)

Part 3. Section I. Ramphastidæ. 1855. 6d.

Part 4. Columbæ. 1856. 1s. 9d.

List of British Birds. By G. R. GRAY, F.L.S. &c. 12mo. 1850. 4s.

List of the Eggs of British Birds. By G. R. GRAY, F.L.S. &c. 12mo. 1852. 2s. 6d.

Catalogue of Shield Reptiles. By Dr. J. E. GRAY, F.R.S. &c.

Part 1. Testudinata. 4to. 1855. £1 : 10s. With figures of all the new species, and of the skulls of the different genera.

- Catalogue of Reptiles. By Dr. J. E. GRAY, F.R.S., V.P.Z.S. &c.
 Part 1. Tortoises, Crocodiles and Amphisbæniæ. 1844. 1s.
 Part 2. Lizards. 1845. 3s. 6d.
 Part 3. Snakes (Crotalidæ, Viperidæ, Hydridæ and Boidæ).
 12mo. 1849. 2s. 6d.

- Catalogue of Amphibia. By Dr. J. E. GRAY, F.R.S., V.P.Z.S.
 Part 2. Batrachia Gradientia. 12mo, 1850. 2s. 6d. With
 Plates of the Skulls and Teeth.

- Catalogue of Fish. By Dr. J. E. GRAY, F.R.S., V.P.Z.S.
 Part 1. Cartilaginous Fish. 12mo, 1851. 3s. With two
 Plates.

These Catalogues of *Reptiles*, *Amphibia*, and *Fish*, contain the characters of all the genera and species at present known; the latter are illustrated with figures of the genera.

- Catalogue of Fish, collected and described by L. T. GRONOW.
 12mo. 1854. 3s. 6d.

- Catalogue of Lophobranchiate Fish. By Dr. J. J. KAUP. 12mo.
 1856. 2s.

- Catalogue of Fish. By Dr. J. J. KAUP.
 Part 1. Apodes, &c. 8vo.

- List of British Fish; with Synonyma. By A. WHITE, F.L.S. &c.
 12mo. 1851. 3s.

- List of Osteological Specimens. By Dr. J. E. GRAY, F.R.S. &c.
 and G. R. GRAY, F.L.S. 12mo. 1847. 2s.

II. ANNULOSA.

- Catalogue of Lepidoptera. By G. R. GRAY, F.L.S.
 Part 1. Papilionidæ, with coloured figures of the new species. 4to. 1852. £1 : 5s.

- List of Lepidopterous Insects. By E. DOUBLEDAY, F.L.S.
 Part 1. Papilionidæ, &c. 12mo. 2nd edit. 1856.
 Part 2. Erycinidæ, &c. 12mo. 1847. 9d.
 Part 3. Appendix to Papilionidæ, Erycinidæ, &c. 1848. 9d.

- List of Lepidopterous Insects, with descriptions of new species.
 By FRANCIS WALKER, F.L.S.

- | | |
|---|-----------------------|
| Part 1. Lepidoptera Heterocera. 12mo. 1854. 4s. | |
| Part 2. 1854. 4s. | Part 5. 1855. 4s. |
| Part 3. 1855. 3s. | Part 6. 1855. 3s. 6d. |
| Part 4. 1855. 3s. | Part 7. 1856. 4s. 6d. |

List of British Lepidoptera; with Synonyma. By J. F. STEPHENS, F.L.S., and H. T. STAINTON, M.E.S.

Part 1. 12mo. Ed. 2. 1856. 2s. Part 3. 1853. 9d.

Part 2. 1852. 2s. Part 4. 1854. 3s.

List of Hymenopterous Insects. By F. WALKER, F.L.S.

Part 1. Chalcididæ. 12mo. 1846. 1s. 6d.

Part 2. Additions to Chalcididæ. 1848. 2s.

Catalogue of Hymenopterous Insects. By F. SMITH, M.E.S.

Part 1. Andrenidæ, &c. 12mo. 1853. 6s., with Plates.

Part 2. Apidæ. 1854. 6s., with Plates.

Part 3. Mutillidæ and Pompilidæ. 1855. 6s., with Plates.

Part 4. Crabonidæ, &c. 1856.

Catalogue of British Hymenoptera. By F. SMITH, M.E.S.

Part 1. Apidæ. 12mo. 1855. 6s.

Catalogue of British Ichneumonidæ. By THOMAS DESVIGNES, M.E.S. 12mo. 1856. 1s. 9d.

List of British Aculeate Hymenoptera; with Synonyma, and the description of some new species. By F. SMITH. 1851. 2s.

Catalogue of Dipterous Insects. By F. WALKER, F.L.S.

Part 1. 12mo. 1848. Part 4. 1849. 6s.

3s. 6d.

Part 5. Supplement I. 1854. 4s. 6d.

Part 2. 1849. 3s. 6d. Part 6. Supplement II. 1854. 3s.

Part 3. 1849. 3s. Part 7. Supplement III. 1855. 3s. 6d.

Catalogue of Homopterous Insects. By F. WALKER, F.L.S. With Plates.

Part 1. 12mo. 1850. 3s. 6d. Part 3. 1851. 3s. 6d.

Part 2. 1850. 5s. Part 4. 1852. 4s.

Catalogue of Neuropterous Insects. By F. WALKER, F.L.S.

Part 1. 12mo. 1852. 2s. 6d. Part 3. 1853. 1s. 6d.

Part 2. 1853. 3s. 6d. Part 4. 1853. 1s.

Catalogue of Hemipterous Insects. By W. S. DALLAS, F.L.S. &c.

With Plates, Part 1. 12mo. 1851. 7s. Part 2. 1852. 4s.

The Catalogues of *Hymenopterous*, *Dipterous*, *Homopterous* and *Hemipterous* Insects contain the description of the species in the Museum which appeared to be undescribed.

Catalogue of British Bruchidæ, Curculionidæ, &c. By JOHN WALTON, F.L.S. 12mo. 1856.

Catalogue of Cassididæ. By Professor BOHEMAN. 12mo. 1856.

Nomenclature of Coleopterous Insects (with characters of new species).

Part 1. Cetoniadæ. 12mo. 1847. 1s. By A. WHITE, F.L.S. &c.

Part 2. Hydrocanthari. 1847. 1s. 3d. By A. WHITE, F.L.S.

Part 3. Buprestidæ. 1848. 1s. By A. WHITE, F.L.S.

Part 4. Cleridæ. 1849. 1s. 8d. By A. WHITE, F.L.S.

Part 5. Cucujidæ. 1851. 6d. By F. SMITH, M.E.S.

Part 6. Passalidæ. 1852. 8d. By F. SMITH, M.E.S.

Part 7. Longicornia. By A. WHITE, F.L.S. With Plates.

Part 1. 1853. 2s. 6d. Part 2. 1855. 3s. 6d.

List of Myriapoda. By G. NEWPORT, F.R.S. &c. 12mo. 1844. 4d.

Catalogue of Myriapoda. By G. NEWPORT, F.R.S. &c.

Part 1. Chilopoda. 12mo. 1856. 1s. 9d.

List of British Anoplura, or Parasitic Insects; with Synonyma.

By H. DENNY. 12mo. 1s.

List of Crustacea; with Synonyma. By A. WHITE. 1847. 2s.

List of British Crustacea; with Synonyma. By A. WHITE, F.L.S.

12mo. 1850. 2s. 6d.

Catalogue of Entozoa; with Plates. By W. BAIRD, M.D., F.L.S.

12mo. 1853. 2s.

Catalogue of British Worms. By G. JOHNSTON, M.D. 8vo.

With Plates.

III. MOLLUSCA.

Catalogue of the Mollusca. By Dr. J. E. GRAY, F.R.S. &c.

Part 1. Cephalopoda Antepedia. 12mo. 1849. 4s.

Part 2. Pteropoda. 1850. 1s.

Catalogue of Bivalve Mollusca. By Dr. J. E. GRAY, F.R.S. &c.

Part 1. Placuniadæ and Anomiadæ. 12mo. 1850. 4d.

Part 2. Brachiopoda Ancylopoda. 1853. 3s. Figures of genera.

Containing the characters of the recent and fossil genera, and the descriptions of all the recent species at present known.

Catalogue of Phaneropneumona or Operculated Terrestrial Mollusca. By Dr. LOUIS PFEIFFER and Dr. J. E. GRAY. 1852. 5s.

Catalogue of Conchifera. By M. DESHAYES.

Part 1. Veneridæ, &c. 12mo. 1853. 3s. Part 2. Petri-
colidæ. 6d.

List of British Mollusca and Shells; with Synonyma. By
Dr. J. E. GRAY, F.R.S.

Part 1. Acephala and Brachiopoda. 12mo. 1851. 3s. 6d.

Catalogue of Pulmonata. By Dr. LOUIS PFEIFFER and Dr.
J. E. GRAY, F.R.S.

Part 1. 12mo. 1855. 2s. 6d.

List of the Shells of the Canaries, described by M. D'Orbigny.
12mo. 1854. 1s.

List of the Shells of Cuba, described by M. D'Orbigny. 12mo.
1854. 1s.

List of the Shells of South America, described by M. D'Orbigny.
12mo. 1854. 2s.

List of the Mollusca and Shells collected and described by
MM. Eydoux and Souleyet. 12mo. 1855. 8d.

Nomenclature of Mollusca. By Dr. W. BAIRD, F.L.S. &c.

Part 1. Cyclophoridæ. 12mo. 1851. 1s. 6d.

IV. RADIATA.

Catalogue of Marine Polyzoa. By G. BUSK, F.R.S.

Part 1. Chilostoma. 12mo. 1852. 17s. With Plates.

Part 2. Chilostoma. 12mo. 1854. 15s. With Plates.

List of British Radiata; with Synonyma. By Dr. J. E. GRAY,
F.R.S. 12mo. 1848. 4s.

List of British Sponges; with Synonyma. By Dr. J. E. GRAY,
F.R.S. 12mo. 1848. 10d.

Catalogue of the Recent Echinida. By Dr. J. E. GRAY, F.R.S.

Part 1. Echinida irregularia. 12mo. 3s. 6d., with plates.

V. BRITISH ZOOLOGY.

List of the British Animals; with Synonyma and references to
figures.

Part 1. Radiata. By Dr. J. E. GRAY. 1848. 4s.

- Part 2. Sponges. By Dr. J. E. GRAY. 1848. 10*d*.
 Part 3. Birds. By G. R. GRAY. 1850. 4*s*.
 Part 4. Crustacea. By A. WHITE. 1850. 2*s*. 6*d*.
 Part 5. Lepidoptera. By J. F. STEPHENS. 1850. Ed. 2.
 1856. 1*s*. 9*d*.
 Part 6. Hymenoptera. By F. SMITH. 1851. 2*s*.
 Part 7. Mollusca Acephala and Brachiopoda. By Dr. J. E.
 GRAY. 1851. 3*s*. 6*d*.
 Part 8. Fish. By A. WHITE. 1851. 3*s*.
 Part 9. Eggs of British Birds. By G. R. GRAY. 1852.
 2*s*. 6*d*.
 Part 10. Lepidoptera (continued). By J. F. STEPHENS.
 1852. 2*s*.
 Part 11. Anoplura or Parasitic Insects. By H. DENNY. 1*s*.
 Part 12. Lepidoptera (continued). By J. F. STEPHENS.
 1852. 9*d*.
 Part 13. Nomenclature of Hymenoptera. By F. SMITH.
 1853. 1*s*. 4*d*.
 Part 14. Nomenclature of Neuroptera. By A. WHITE.
 1853. 6*d*.
 Part 15. Nomenclature of Diptera. By A. WHITE. 1853. 1*s*.
 Part 16. Lepidoptera (completed). By H. T. STAINTON,
 M.E.S. 1854. 3*s*.
 Catalogue of British Hymenoptera (Bees). By F. SMITH. 1855.
 6*s*., with plates.
 Catalogue of British Ichneumonidæ. By THOMAS DESVIGNES,
 M.E.S. 12mo. 1856. 1*s*. 9*d*.
 Catalogue of British Bruchidæ, Curculionidæ, &c. By JOHN
 WALTON, F.L.S. 12mo. 1856.
 N.B.—These Catalogues can be obtained at the Secretary's Office
 in the BRITISH MUSEUM; or through any Bookseller.

VI. BOOKS ILLUSTRATING OR DESCRIBING PARTS OF THE ZOOLOGICAL COLLECTIONS.

- Illustrations of Indian Zoology, from the Collection of Major-
 General Thomas Hardwicke. By Dr. J. E. GRAY, F.R.S.
 Folio. 2 vols. 1830–1835.
 Zoology of the Voyage of H.M.S. Beagle. Edited by CHARLES
 DARWIN, F.R.S. 4to. 1840–1844.
 Zoology of the Voyage of H.M.S.S. Erebus and Terror. Edited
 by Sir JOHN RICHARDSON, M.D., F.R.S. &c., and Dr. J. E.
 GRAY, F.R.S. 4to. 1844–1845.

- Zoological Miscellany. By W. E. LEACH, M.D., F.R.S. 8vo. 3 vols.
- Spicilegia Zoologica. By J. E. GRAY, F.R.S. 4to. 1829-1830.
- Zoological Miscellany. By J. E. GRAY, F.R.S. 8vo. 1831.
- Knowsley Menagerie. Part 2. Hoofed Animals. By Dr. J. E. GRAY, F.R.S. Folio. 1850.
- A Monograph of the Macropodidæ. By JOHN GOULD, F.R.S. Folio. 1841-1844.
- Mammals of Australia. By JOHN GOULD, F.R.S. Folio. 1845.
- Genera of Birds. By G. R. GRAY, F.L.S. Illustrated by plates by D. W. Mitchell, Sec. Z.S. Folio. 3 vols. 1844-1849.
- The Birds of Jamaica. By P. H. GOSSE, F.R.S. 8vo. 1847.
- Illustrations of the Birds of Jamaica. By P. H. GOSSE, F.R.S. 8vo. 1849.
- Monograph of Ramphastidæ. By JOHN GOULD, F.R.S. Folio.
- Birds of Australia. By JOHN GOULD, F.R.S. Folio. 1848.
